Subject: **Expansion of Cement Plant (0.594 MTPA to 3.85 MTPA), Clinker (0.40 MTPA to 2.31 MTPA), limestone mining (0.6MTPA to 3MTPA) and setting up of a coal based CPP (16MW) of M/s Anjani Portland Cement Ltd. at village Chintapalem, dist. Nalgonda, A.P. – Extension of validity of EC and amendment in EC – reg.**

Sir,

This has reference to your letter No. Anjani Cement/MoEF/EC Extension/Amendment/ 2014 dated 27.10.2014 along with updated Form-I regarding project mentioned above.

2.0 The Ministry of Environment, Forest and Climate Change has examined your application. It has been noted that the project was accorded Environment Clearance vide letter No. J-11011/892/2008-IA.II(I) dated 05.01.2010 for expansion of cement plant from 0.594 MTPA to 3.85 MTPA, clinker from 0.40 MTPA to 2.31 MTPA, limestone mining from 0.6MTPA to 3MTPA and setting up of a 16 MW coal based CPP.

3.0 The above proposal was considered by the Expert Appraisal Committee (Industry) during its 27th meeting held on 13th -14th November, 2014. The Committee noted that the project was granted Environment Clearance on 05.01.2010, whose validity will expire on 01.01.2015. It was informed that of the Integrated project, only some of the units have been installed. It is further requested for use of imported coal of which the range of sulphur would be 0.6-1%. Further, it was informed that there is an error in the EC letter on the water requirement, which states that water required is 250m³/d whereas in the page 133& 142 of the EIA-EMP Report, it is stated to be 1947m³/d. However, due to installation of air cooled condensers in the CPP, the actual water requirement would reduce from 1947m³/d to 1100 m³/d. It has been requested by PP for this correction in the

h

EC. Further it has been requested that the total project area of the cement plant would increase from 34.58 ha to 51.48 ha, because of the purchase of 10.9 Ha of adjoining cement project site.

4.0 Looking into the status of implementation of the units and the reasons given by you, the Committee recommended the extension of validity of EC for a period of 5 years with effect from 5th January, 2015. The Committee also recommended to amend the EC dated 5th January, 2010 to use of Imported Coal (100 %) / Indian Coal (100%) / 70 % Imported coal + 30 % Indian Coal (Blended coal), total water consumption of 1100 m³/day for Cement Plant, Captive Power Plant and Captive Limestone Mine instead of 250 m³/day indicated vide specific conditions xii & xiii and the total area for Plant & Colony to be amended as (34.58 ha +16.9 ha) 51.48 ha (with no change in mining lease area).

5.0 The Ministry of Environment, Forest and Climate Change considered the recommendations of the Expert Appraisal Committee (Industry) and decided to (a) extend the validity of Environment Clearance letter No. J-11011/892/2008-IA.II(I) dated 05.01.2010 for a period of 5 years with effect from 01.01.2015 and (b) amend the Environment Clearance No. J-11011/892/2008-IA.II(I) dated 05.01.2010 with regard to following:

- i. The total area for Plant & Colony to be amended as (34.58 ha +16.9 ha) 51.48 ha (with no change in mining lease area).
- ii. In specific condition numbers (xii) and (xiii), the total water requirement for the project may be read as 1100 m³/day instead of 250 m³/day.

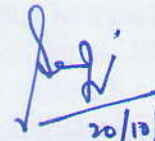

6.0 The following additional specific conditions have been stipulated for compliance:

- i. The project proponent should install 24x7 air and water monitoring devices to monitor air emission and effluent discharge, as provided by CPCB and submit report to Ministry and its Regional Office.
- ii. The project proponent should use Imported Coal (100 %) / Indian Coal (100%) / 70 % Imported coal + 30 % Indian Coal (Blended coal) in the CPP.

7.0 All other conditions stipulated in the environmental clearance even no. dated 04/09/2014 shall remains the same.

8.0 In case, there is a change in the scope of the project, fresh environmental clearance shall be obtained.

This issues with the approval of the Competent Authority.

20/10/2015
